PROFESSIONAL SUMMARY

Full Stack Developer with solid experience in building scalable, high-performance applications. Specialist in the TypeScript ecosystem with advanced proficiency in Angular, Next.js, and NestJS. Enthusiast of the AI First methodology in personal projects, natively integrating Artificial Intelligence into the development lifecycle. Proven track record in technical leadership and software architecture, leveraging LLMs to accelerate the delivery of robust solutions.

TECHNICAL SKILLS

Methodology	AI First Development, Clean Code, Agile Methodologies (Scrum/Kanban).
Front-end	Angular (v2+), Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3.
Back-end	NestJS, Node.js, RESTful APIs, Microservices Architecture.
AI & LLMs	API Integration (OpenAI, Gemini), Prompt Engineering, Cursor, GitHub Copilot.
State Management	Redux, NgRx, Context API.
Integrations	Google Maps API, OpenStreetMap, Geoprocessing.
Languages	English (Advanced - Technical reading and writing), Portuguese (Native).

PROFESSIONAL EXPERIENCE

Software Analyst | Atman Systems

June 2021 – December 2025

Vitória, ES, Brazil

- **Full Stack Architecture:** Development of complex applications using Angular for the front-end and support in back-end services, ensuring scalability and maintainability.
- **Technical Leadership:** Led the implementation of interactive dashboards and automated reporting, directly impacting strategic decision-making for clients.
- **AI Support:** Strategic use of AI tools to optimize internal workflows, accelerating unit test writing and legacy system refactoring.
- **Geoprocessing:** Advanced integration of maps (Google Maps and OpenStreetMap) and georeferenced data for logistics optimization and complex data visualization.
- **Performance Optimization:** Direct action on technical bottlenecks, resulting in significant reductions in response and loading times.

Development Intern | Public Labor Prosecutor's Office (MPT-ES) March 2019 – March 2021

Vitória, ES, Brazil

- Development of a mobile application with React Native and Redux focused on attendance control and back-end service integration.
- Active participation in the entire software development lifecycle, applying best practices for

versioning with Git.

FEATURED PROJECTS

MangaTracker & MangaTracker Sync

Full Stack reading monitoring ecosystem developed under the AI First premise. Utilizes Next.js for the front-end and NestJS for the back-end, featuring scraping logic refined via prompt engineering to handle complex dynamic data structures.

Personal Portfolio

SEO and performance-optimized platform, serving as a technical hub to demonstrate new workflows and modern development tool integrations.

EDUCATION

B.S. in Information Systems

January 2025

Federal Institute of Espírito Santo (IFES) – Serra, ES, Brazil
